

## Miniature Arrangement under 4"

Size in paramount in this arrangement. It can be as small as 1" but must NOT be bigger than 4".

The best way to ensure it is not too big is to make an aperture or bridge 4"x 4" and pass it round the finished piece to ensure it fits within the space.

If you mount your piece on a base you must ensure that this fits within the space as well.

Plant materials for these tiny pieces can be very fragile and can wilt quickly, so test them out prior to your final piece to see if they will survive the day. [It is best to do these tiny pieces on the day of the show, but if you do them the night before keep them sprayed and chilled]

You can use a wide range of containers and as long as it will hold water or a piece of oasis it will keep your flowers fresh.

This piece is lovely but the brick would probably make it too high.

While this cute little book could fit the theme beautifully.
